

Instructions for running the System Pathways Report

For this element, we are asking you to run the System Pathways report as a tool to look at client pathways through the service delivery system including some equity analysis.

In the Data Warehouse, please run the System Pathways report for your HUD funded projects. Run them by project type (all PSH, all RRH, all ES, all TH) for the timeframe 10/1/2023-9/30/2024. We know that this is not a full year as 9/30/2024 has not come yet.

Review the section “Clients by Race” to get an idea of where clients are exiting to as you continue to address racial equity to determine if there are inequities and gaps and how you will continue to address them.

Instructions:

- Login into the Data Warehouse
- Under Reports on the left panel, click on Performance
- Select System Pathways
- Enter the following parameters:
 - Start Date/End Date: 10/1/2023-9/30/2024 (not a full year yet)
 - CoC Codes: Pontiac, Royal Oak/Oakland County CoC (MI-504)
 - Project Groups: Select your created reporting group by type (e.g. PSH, RRH, etc.)
- Click Queue Report

Once it finishes, Print the report and save as .PDF (DO NOT USE the download button) and send to us with your scoring document.
