

ALLIANCE FOR HOUSING

2017 ANNUAL STATE OF HOMELESSNESS

The Alliance for Housing is Oakland County's Continuum of Care. The Alliance members address the needs of persons experiencing homelessness through a community based process of coordination of care including housing and self-sufficiency through linking with community resources. The members are dedicated to ending homelessness and to make a difference in the lives of persons in need.

The 2017 Homeless Data Report is designed and intended to provide a snapshot of the state of homelessness in Oakland County using data extrapolated from the Homeless Management Information System (HMIS) and data provided by various other service organizations that also serve homeless persons in local programs but do not use the HMIS.

This report contains data on the demographics of the people served in Oakland County and is a tool to inform the community of the types of services provided to persons seeking assistance and to show the success of the programs and the persons served. As part of Michigan's statewide system, the HMIS helps the Alliance for Housing measure and report out patterns of homelessness, measure service effectiveness, and improve care.

The numbers presented in this report tell the story of persons in Oakland County who experienced homelessness in 2017 and sought out assistance from organizations committed to ending homelessness.

TOTAL CLIENTS

Total Persons	7,741
Singles	67%
